

Informatica

Aims and Scope

The quarterly journal *Informatica* provides an international forum for high-quality original research and publishes papers on mathematical simulation and optimization, recognition and control, programming theory and systems, automation systems and elements. *Informatica* provides a multidisciplinary forum for scientists and engineers involved in research and design including experts who implement and manage information systems applications. The aims are:

- to provide a balanced representation of theory and applications
- to cover the research results of both the East and the West equally
- to provide fast publication of quality papers by the efficient work of referee
- to provide an early access to the information by presenting the PDF files of the complete papers on the Internet

All these aims taken together explain the unique quality of this journal and how it is distinguished from other journals in the rapidly expanding field.

Submission of Papers

Informatica uses an electronic submission system. Please consult these guidelines before you submit your paper: <http://www.mii.lt/informatica/instruct.htm>

Subscription Information

Informatica (ISSN 0868-4952) will be published in 1 volume of 4 issues in 2010 (Volume 21). Institutional subscription (print and online): €258 / US\$360 (including postage and handling). Institutional subscription (online only): €220 / US\$305

Abstracted / Indexed by

ACM Computing Reviews, ACM Guide to Computing Literature, Cambridge Scientific Abstracts, CompuMath Citation Index, Computer Literature Index, CPX, Current Contents®/Engineering, Computing, and Technology, Current Mathematical Publications, EBSCO database, Inspec, International Abstracts in Operations Research (IAOR), Journal Citation Reports/Science Edition, MasterFILE, Mathematical Reviews, MathSciNet, Science Citation Index Expanded (SciSearch®), Scopus, VINITI, Zentralblatt MATH.

Recent Contents Volume 20, Number 1 (2009)

On Recursive Calculation of M- and GM-Estimates by Direct Identification in LQG Control Systems / *N. Atanasov*

Key-Dependent S-Box Generation in AES Block Cipher System / *K. Kazlauskas and J. Kazlauskas*

Analysis of Automatic Stress Assignment in Slovene / *D. Marinčič, T. Tušar, M. Gams and T. Šef*

Implementation of PCCD-OFDM-ASK Robust Data Transmission over GSM Speech Channel / *Z. Mezgec, A. Chowdhury and B. Kotnik*

A Web-Based Bimatrix Game Optimization Model of Polynomial Complexity / *J. Mockus*

Simple Compression Algorithm for Memoryless Laplacian Source Based on the Optimal Companding Technique / *Z.H. Perić, M.D. Petković and M.R. Dinčić*

Gabor-Based Kernel Partial-Least-Squares Discrimination Features for Face Recognition / *V. Štruc and N. Pavešić*

Robust Key Exchange Protocol between Set-Top Box and Smart Card in DTV Broadcasting / *E-J. Yoon*

A Joint-Diffused Inpainting Model for Underexposure Image Preserving the Linear Geometric Structure / *J. Wu, Q. Ruan and G. An*
