

Asymptotic Analysis

Aims and Scope

The journal *Asymptotic Analysis* fulfils a twofold function. It aims at publishing original mathematical results in the asymptotic theory of problems affected by the presence of small or large parameters on the one hand, and at giving specific indications of their possible applications to different fields of natural sciences on the other hand. *Asymptotic Analysis* thus provides mathematicians with a concentrated source of newly acquired information which they may need in the analysis of asymptotic problems.

Submission of Papers

Please consult our website, www.iospress.nl, for detailed information to authors.

Subscription Information

Asymptotic Analysis (ISSN 0921-7134) will be published in 5 volumes of 4 issues in 2010 (Volumes 66-70). Institutional subscription (print and online): €1620 / US\$2275 (including postage and handling). Institutional subscription (online only): €1430 / US\$2000.

Abstracted / Indexed in

Applied Mechanics Reviews, CompuMath Citation Index, Computer Literature Index, CPX, Current Mathematical Publications, EBSCO database, Inspec, Journal Citation Reports/Science Edition, MasterFILE, Mathematical Reviews, MathSciNet, Science Citation Index-Expanded (SciSearch®), Scopus, Zentralblatt MATH.

Recent Contents Volume 63, Number 1-2 (2009)

Semiclassical reduction for magnetic Schrödinger operator with periodic zero-range potentials and applications

B. Helffer and K. Pankrashkin

Analytic smoothing effect for the Schrödinger equation relative to the harmonic oscillator equation

A. Atallah B. and C. Mecherqui

Two-parameter asymptotics in the Cauchy problem for a quasi-linear parabolic equation

S.V. Zakharov

Asymptotic behavior of a thermoviscoelastic plate with memory effects

M. Grasselli, J.E. Muñoz Rivera and M. Squassina

On the Weyl law for Toeplitz operators

R. Paoletti

Hyperasymptotic expansions of the modified Bessel function of the third kind of purely imaginary order

W. Shi and R. Wong
