

Cheminformatics

Aims and Scope

Cheminformatics features invited reviews and innovations in the rapidly growing and evolving field of computerized chemical information handling. *Cheminformatics* covers all those fields in which information technology and resources are used 'to transform chemical data into information and information into knowledge'. The journal is of particular interest to chemists, computer scientists and information specialists. By featuring invited research review studies and programming innovations, the journal services the scientific community filling a need not yet otherwise met. The scope of *Cheminformatics* encompasses papers reviewing research and applications, highlighting opportunities and indicating current limitations in computerized chemical information handling covering the following major areas:

- Chemical Information Acquisition, i.e. methods used for generating and collecting chemical data experimentally and by molecular simulation, including computerized synthetic analysis.
- Chemical Information Management, i.e. storage, handling and retrieval of data.
- Chemical Information Use, i.e. chemical database development and usage, data analysis and data mining including use of chemically aware Web Language.

Editor-in-Chief

Professor Curt M. Breneman
RPI Department of Chemistry and Chemical Biology
Center for Biotechnology and Interdisciplinary Studies
Rensselaer Polytechnic Institute
110 8th Street
Troy, NY 12180
USA
Tel.: +1 518 276-2678
Fax: +1 518 276-4887

Editorial Board

An editorial board of high international standard is being invited.

Submissions of Papers

Manuscripts should be submitted electronically to: submissions@iospress.nl.

Subscription Information

Cheminformatics (1572-4778) will be published in 1 volume of 2 issues in 2010 (Volume 3). Institutional subscription (print and online): €178 / US\$212 (including postage and handling). Institutional subscription (online only): €160 / US\$190.
