

Multiagent and Grid Systems

An International Journal

Aims and Scope

Multiagent and Grid Systems - An International Journal aims to provide a timely and focal research forum for academics and practitioners in the thematic areas of Multiagent Systems, Grid Computing, Autonomic/Adaptive Computing, and their intersections. It publishes peer-refereed research and application papers of high technical quality and scientific standard. The journal features original research papers, comprehensive and sound survey papers about the state-of-the-art, technical papers about implementation issues of general interest, applications and field works. Moreover, from time to time it presents special issues on contemporary problems of profound research challenge in its thematic areas.
