The papers presented in this publication are mainly concerned with one of the central objectives of the EMPIRE project (Empirical Methods in Bioethics): to investigate the ways in which data generated by empirical research can be relevant to bioethical thinking and regulation concerning health care and human use of biotechnology, but also touch on the issue of what kind of empirical research that is most relevant in this context. They approach these questions in a number of ways, from the very theoretical to the more practical. Some are skeptical to the use of empirical research and data, whereas others are much more positive. They thereby reflect the full breadth of the analysis carried out as part of the project. The EMPIRE project is sponsored by the European Commission, DG-Research as part of the Quality of Life and Management of Living Resources research program.
Contents:

Section 1. What Role Can Empirical Research Play in Bioethics?
A Defence of Empirical Bioethics - Søren Holm
Healthcare and the Habermasian Public Sphere - Andrew Edgar
Putting Empirical Studies in their Place - John Harris
Can There Be Moral Experts? - Louise Irving and Nina Hallowell

Section 2. Empirical Bioethics Considered: Critiquing the Use of Empirical Research
What should we do about it? Implications of the Empirical Evidence in Relation to Comprehension and Acceptability of Randomisation - Angus Dawson
Carol Gilligan and her Different Voice - Heta Aleksandra Gylling
Who Should Decide and Why? The Futility of Philosophy, Sociology and Law in Institutionised Bioethics and the Unwarrantability of Ethics Committees – Tuija Takala
Empirical Investigations of Moral Development - Michael Norup
Theory and Methodology of Empirical-Ethical Research - Lieke Van der Scheer, Ghislaine Van Thiel, Johannes Van Delden and Guy Widdershoven

Section 3. Empirical Bioethics in Practice
An Empirical Study of the Informed Consent Process of a Clinical Trial - Anne Gammelgaard
Stimulating Public Debate on the Ethical and Social Issues Raised by the New Genetics - Mairi Levitt, Kate Weiner and John Goodacre
The Use of Computer Simulation and Artificial Intelligence in the Study of Ethical Components of Medical Decision-Making - Peter Øhrstrøm, Jørgen Albretsen and Søren Holm

Conclusion
Empirical Research in Bioethics: Report for the European Commission - Søren Holm and Louise Irving

Order Information

If you would like to order one or more copies of the above, please fill in this order form and send it back to:

IOS Press, Promotion Department, Nieuwe Hemweg 6B, 1013 BG, Amsterdam, The Netherlands.

O I would like to order .... copies of Engaging the World: The Use of Empirical Research in Bioethics and the Regulation of Biotechnology (US$ 99 / €85 / £60)

O Please bill me

O Please charge my credit card
O Amer. Express O Euro/Master O Visa
