

## **Desertification Combat and Food Safety**

The Added Value of Camel Producers  
Volume 362 NATO Science Series: Life and  
Behavioural Sciences

Edited by: B. Faye and P. Esenov  
February 2005, 240 pp., hardcover

ISBN: 1-58603-473-1

Price: US\$126 / €105 / £74

This publication brings together desert and camel scientists from Western European countries, Mediterranean countries and Central Asian Republics. Scientists from Central Asia are confronted with the demanding challenge of desertification and maintenance of animal productivity in order to satisfy human requirements both in quantity and quality. The problem is complex and solutions need a multidisciplinary investment. The knowledge of the desertification process and the place of animal production in desert ecosystem is increasing in many countries. New approaches and methodologies have been implemented for a better observation and understanding of the situation.

*Desertification Combat and Food Safety* contributes to the exchange between scientists in order to allow access to those new approaches and methodologies by all desert and camel scientists in the involved countries. Most contributors are well-known in the camel sciences community. All of them have significantly contributed to a better understanding of camel biology, camel productivity or of the camel as an element of the desert ecosystem. The confrontation of the research achieved in those countries with the scientific activities achieved in Central Asia is quite important. It contributes to the improvement of the methods used in those countries and at the very least helps the scientists from Central Asia to access more recent publications and to reach the international standard for publications.

## **Contents:**

### **1. Desertification, Selection, Breeding and Diseases of Camels**

- Camel – History of Its Domestication
- Participatory Approaches to Using the Camel in Combating Desertification
- The Current Status of the Wild Bactrian Camel
- Environmental Education and Public Awareness: Valuable Tools in Combating Desertification
- Desertification and Camel-Breeding in Kalmykia (Russian Federation)
- Realization of the National Action Program to Combat Desertification in Turkmenistan
- Diseases of Camels, Their Preventive Maintenance and Treatment
- The Most Important Infectious Diseases in Camelids
- Fungal Infection of Camelids
- Role and Method of Advising for Producers in Natural Hardship Conditions
- Factors Affecting Reproductive Performance of Camels at the Herd and Individual Level
- Assisted Reproduction in Dromedary Camels
- Camel Genetic Resources and Ways of Camel Breeding Products Use for Population of Kazakstan Arid Areas

### **2. Camel Keeping and Productiveness**

- Productivity Potential of Camels
- Body Lipids and Adaptation of Camel to Food and Water Shortage: New Data on Adipocyte Size and Plasma Leptin
- Standards for Camel Milk
- Modern Dairy Products from Traditional Camel Herding: An Experience in Mauritania
- Lactoferrin of Camel Milk of Kazakhstan
- Artificial Nursing of Camel Calves: An Effective Technique for Calves; Safeguard and Improving Herd Productivity
- Camel Dairy in Eastern Africa: Present State and Future Perspectives
- Influence of Feeding on Camel Milk Components
- Probiotic Properties of a Sour-Milk Product: Shubat from the Camel Milk
- The Effectiveness of the People Treatment with Camel Chal
- Development of Products for Child Nutrition and for Medical and Prevention; Purposes on the Base of Camel Milk
- Camel Milk Production and Transformation in Sub-Saharan Africa
- Pasture Ration of Arvana Camels in Desert Pastures
- Meat Productivity of the Camel Arvana Breed and Ways to Increase It
- The Milk Productivity of the Camel Arvana Breed and Its Use
- Wool Productivity and Quality of Fleece in the Camel Arvana Breed
