We humans are tribal, grouping ourselves by a multitude of criteria: physical, intellectual, political, emotional, etc. The Internet and its auxiliary technologies have enabled a novel dimension in tribal behavior during our recent past. This growing connectivity begs the question: will individuals and their communities come together to solve some very urgent global problems? At MMVR, we explore ways to harness information technology to solve healthcare problems – and in the industrialized nations we are making progress. In the developing world however, things are more challenging. Massive urban poverty fuels violence and misery. Will global networking bring a convergence of individual and tribal problem-solving? Recently, a barrel-shaped water carrier that rolls along the ground was presented, improving daily life for many people. Also the One Laptop per Child project is a good example of how the industrialized nations can help the developing countries. They produce durable and simple laptops which are inexpensive to produce. At MMVR, we focus on cutting-edge medical technology, which is generally pretty expensive. While the benefits of innovation trickle downward, from the privileged few to the broader masses, we should expand this trickle into a flood. Can breakthrough applications in stimulation, visualization, robotics, and informatics engender tools as ingeniously as the water carrier or laptop? With some extra creativity, we can design better healthcare for the developing world too.
Contents:
(First twenty papers)

• Collaborative Voxel-Based Surgical Virtual Environments / Eric Acosta, Gilbert Muniz, Rocco Armonda, Mark Bowyer and Alan Liu
• Repeated Palpatory Training of Medical Students on the Virtual Haptic Back / Kapil Bajaj, John N. Howell, Robert R. Conatser and Robert L. Williams II
• Strategies to Reduce Patient Harm: Understanding the Role of Design and the Built Environment / Paul Barach
• A Non-Linear Mass-Spring Model for More Realistic and Efficient Simulation of Soft Tissues Surgery / Ehsan Basafa, Farzam Farahmand and Gholamreza Vossoughi
• Learning & Retention in Adaptive Serious Games / Bryan P. Bergeron
• Direct Versus Indirect Laryngoscopic Visualization in Human Endotracheal Intubation: A Tool for Virtual Anesthesia Practice and Teleanesthesiology / Ben H. Boedeker, Benjamin W. Berg, Mary Berghagen and W. Bosseau Murray
• Far Forward Feasibility: Testing a Cricothyroidotomy Simulator in Iraq / Mark W. Bowyer, Michael Manahl, Eric Acosta, Joshua Stutzmen and Alan Liu
• Evaluating the Clinical Utility of Stereoscopic Clinical Photography / C.D. Brack and I.L. Kessel
• Trocar Insertion: The Neglected Task of VR Simulation / Vera Brümmer, Heather Carnahan, Allan Okrainec and Adam Dubrowski
• Efficient Soft Tissue Deformation Using Charged Particles / Oliver Buckley and Nigel W. John
• Simulation of Dynamic Ultrasound Based on CT Models for Medical Education / Benny Bürger, Ciamak Abkai and Jürgen Hesser
• Steps Towards Open Standards for Medical Virtual Reality Systems / Oliver Burgert, Michael Gessat, Stephan Jacobs, Volkmar Falk and Heinz U. Lemke
• Patient Specific Physical Anatomy Models / B.M. Cameron, D.R. Holmes III, M.E. Rettmann and R.A. Robb
• Towards Developing an Immersive and Interactive Virtual Fairview Peri-Operative Environment / Baoquan Chen and Robert M. Sweet
• Towards Anatomical Modelling of Multiple Organs Interaction Using Real Time GPU Based Non-Linear Elasticity / Mario Cheng, Zeike A. Taylor and Sébastien Ourselin
• Visualizing the Medical Modeling and Simulation Database: Trends in the Research Literature / C. Donald Combs and Meenal Walia
• Effects of Repeated CPR Training in Virtual Worlds on Medical Students’ Performance / J. Creutzfeldt, L. Hedman, C. Medin, C.J. Wallin and L. Felländer-Tsai
• A Flexible, Conformal Ultrasound Array for Medical Imaging / Martin O. Culjat, Rahul S. Singh, Christopher D. Utley, Stephen P. Vampola, Behnam Sharareh, Hua Lee, Elliott R. Brown and Warren S. Grundfest

Order form:

If you would like to order one or more copies of the above, please fill in this order form and send it back to:

IOS Press, Promotion Department, Nieuwe Hemweg 6B, 1013 BG, Amsterdam, The Netherlands.

O I would like to order .... copies of Medicine Meets Virtual Reality 16

O Please bill me

O Please charge my credit card

O Amer. Express O Euro/Master O Visa

Exp. Date 
Security code
Card no.
