## Aims and Scope

The *Journal of Vestibular Research* is a peer-reviewed journal that publishes experimental and observational studies, review papers and theoretical papers based on current knowledge of the vestibular system. Subjects of the studies can include experimental animals, normal humans and humans with vestibular or other related disorders. Study topics can include the following:

- Neurophysiology of balance, including the vestibular, ocular motor, autonomic and postural control systems
- Anatomy of the vestibular system, including vestibulo-ocular, vestibulo-spinal and vestibulo-autonomic pathways
- Neurochemistry and neuropharmacology of balance, both at the systems and single neuron levels
- Vestibular-related human performance in various environments
- Psychophysics of spatial orientation
- Space and motion sickness
- Balance disorders
- Vestibular rehabilitation
