Medicinal Plants
International Journal of Phytomedicines and Related Industries

Aims and Scope
The international journal *Medicinal Plants* on medicinal crops and related industries covers all aspects of medicinal crop cultivation, medicinal uses of plants, their active ingredients and related industries. This journal promotes the interdisciplinary exchange of knowledge and ideas in medicinal plant crops and related industries.

*Medicinal Plants* aims to provide the most innovative, original and rigorous developments in research and industry, thereby, to set the standards. Interdisciplinary studies of fundamental problems on the subject are given high priority. The structure of the journal takes into account the broad scope of R&D in medicinal plant crops research and industry. Thus in addition to full length and short papers on original research, the journal also includes regular features as review articles, meeting reports and scientific correspondence.
