Aims and Scope
Clinical Hemorheology and Microcirculation, a peer-reviewed international scientific journal, serves as an aid to understanding the flow properties of blood and the relationship to normal and abnormal physiology. The rapidly expanding science of hemorheology concerns blood, its components and the blood vessels with which blood interacts. It includes perihemorheology, i.e., the rheology of fluid and structures in the perivascular and interstitial spaces as well as the lymphatic system. The clinical aspects include pathogenesis, symptomatology and diagnostic methods, and the fields of prophylaxis and therapy in all branches of medicine and surgery, pharmacology and drug research. The endeavour of the Editors-in-Chief and Publishers of Clinical Hemorheology and Microcirculation is to bring together contributions from those working in various fields related to blood flow all over the world. Important new topics will increasingly claim more pages of Clinical Hemorheology and Microcirculation: the role of hemorheological and microcirculatory disturbances for epidemiology and prognosis, in particular regarding cardiovascular disorders, as well as its significance in the field of geriatrics. Authors and readers are invited to contact the Editors for specific information or to make suggestions.

Editors-in-Chief
J.-F. Stoltz
Editorial Office: P. Menu
UMR CNRS 7563 Bioingénierie – Faculté de Médecine F-54505 Vandoeuvre lès Nancy, France

Subscription Information
Recent Contents Volume 47, Number 4 (2011)

First five articles (Visit our website for full contents)
http://iospress.metapress.com/content/v5356802h4v5/

High-dose atorvastatin treatment in patients with peripheral arterial disease: Effects on platelet aggregation, blood rheology and plasma homocysteine
B. Van Der Loo, S. Spring and R. Koppensteiner
DOI 10.3233/CH-2011-1386

Optimal haematocrit in subjects with normal haemoglobin genotype (HbAA), sickle cell trait (HbAS), and homozygous sickle cell disease (HbSS)
A.S. Bowers, D.J. Pepple and H.L. Reid
DOI 10.3233/CH-2011-1387

Endurance running trial in tropical environment: A blood rheological study
DOI 10.3233/CH-2011-1388

Comparison of soluble CD40L concentrations and release capacities in apheresis and prestorage pooled platelet concentrates
F. Wenzel, W. Günther, A. Baertl, R. Lassoher, J. Rox, J.C. Fischer and G. Giers
DOI 10.3233/CH-2011-1407

Erythrocyte aggregation in patients with systemic lupus erythematosus
DOI 10.3233/CH-2011-1409

Order Form
