The current COVID-19 crisis is affecting many lives, and also research initiatives. At *Bridge Structures* (BRS) we are working from home where possible, to continue assessing papers for publication to progress advances in the area of bridge engineering. We appreciate the time and efforts of our editors, authors, and reviewers to make this possible. It is understandable that extensions or reassignments may be needed, in which case we ask you to let us know when so desired (by email to: khaled@kmbtc.com). Stay healthy. Stay safe.
