

TERENCE PARTRIDGE:
A DISTINGUISHED CAREER DEDICATED TO MUSCLE RESEARCH

Special Issue – Call for Papers | iospress.com/journal-of-neuromuscular-diseases

Special Issue – Call for Papers

A special issue of JND is planned celebrating the distinguished career of Prof. Terence Partridge in the field of **myogenesis and skeletal muscle diseases**. The guest editors of this issue are Dr. Jyoti Jaiswal and Dr. Kanneboyina Nagaraju and the publication date will be summer 2021.

This special issue aims to highlight the significant contributions Prof. Terry Partridge has made to the field of muscle biology both through his own discoveries over half a century and the exceptional trainees that he has produced over this period. Submissions will be a tribute to his contributions and will help lead the way towards future growth in this field.

If you have been affiliated with Prof. Partridge and would like to participate in this special issue, then we invite you to contribute a primary research article to this special edition. Anyone interested in submitting should first get in touch to outline the submission topic so the editors can assess whether the paper will fit the scope of the journal.

For more information on formatting your manuscript, see the journal's website [here](https://iospress.com/journal-of-neuromuscular-diseases).

Submission deadline: 31 March 2021

We hope you will consider participating in this project, and look forward to hearing from you.
